CATAMARANO

Breakfast and off we go to discover secret bays, stacks, little beaches reachable only by sea! The skipper will show us his world until we reach **Stromboli and its volcano**.

The **Sciara del fuoco** will be seen, the island's main attraction with night sailing under the starry Mediterranean sky and then return to Panarea for an overnight stay on a catamaran.

This is one of the highlights of the proposed trip, exciting experience, hard to forget. "Iddu," as the Aeolians call him, in Italian translated "Lui" masculine, is in perpetual activity.

# Day #4 Salina island

Tuesday 

Breakfast and departure for **Salina, the greenest**....the island from the recognizable double hump formed by two craters extinct volcanoes. Salina, an **island of vineyards** and important wineries, the island of **capers** and the small farms that harvest, process and export them all over the world. Here, as on Lipari, the urban environment is lively though smaller, chic and gathered around a church. Dock in the harbor at Santa Marina, the main center of the island for a **stroll through the alleys of the historic center old town**. In the afternoon, upon request, it is possible to visit a renowned winery among the best in the Malvasia production, with **tasting of wines and typical local products**.
